WORK EXPERIENCE

Engineering Manager
BharatPe, Gurgoan

MAY 2020 - PRESENT

- Played a pivotal role in BharatPe's foundational growth, leveraging over 4 years of expertise in product development across lending, payments, and native platforms.
- Delivered flagship features including Easy Loans, Gold Loan, 12% Club, UPI, and SDK integrations, driving business growth and enhancing user experience.
- Led the development of critical lending solutions such as Route to Eligibility, LMS revamp, and Loan Marketplace.
- Spearheaded the delivery of native products like BharatPe TPAP and Merchant Plugin, while implementing key security enhancements.
- Innovated in payment gateways with features like UPI AutoPay, Mandates, and PA PG, ensuring seamless and secure transactions.
- Contributed to the development of BharatPe's UI design system and Native Web Interface Support Handler, elevating user experience and platform consistency.
- Ensured high compliance and security standards, optimizing app performance and safeguarding user data.
- Streamlined processes, mentored team members, and fostered a culture of innovation and continuous improvement.
- Collaborated with cross-functional teams to deliver impactful solutions, enhancing customer satisfaction and driving revenue growth.

Associate Technology Level 2
Publicis Sapient, Gurgaon

OCT 2019 – APR 2020

- Contributed to the frontend development of the Heathrow Airport Holdings Limited project, utilizing cutting-edge technologies like ReactJS, Redux, Redux-Saga, JavaScript, HTML, and CSS.

EDUCATION

B. Tech.
Jawaharlal Nehru
Technological University
Kakinada

2010 - 2014

LANGUAGES

- English (Fluent)
- Hindi (Basic)
- Telugu (Native)

- Delivered key features including a global search results page, dynamic data headers and tabs, edit flight details functionality, and comprehensive product and service lists.
- Advocated for modular and testable code practices, enhancing team efficiency and ensuring maintainable codebases.
- Consistently met tight deadlines, demonstrating adaptability and proficiency in a fast-paced environment.

Senior Software Engineer
MiSport, Gurgaon

MAY 2017 – SEP 2019

- Developed a match-searching engine from scratch, enabling real-time scorecards, ball-by-ball statistics, videos, and live streaming for PVM+ users.
- Enhanced the PVM+ product with features like minute-by-minute video lists, individual player modules, highlights, and a tagging system for coaches to manage video details.
- Contributed to the development of PV Video Player, Newsfeed, Timeline, Podcasts, and Articles while ensuring multi-device support and responsive design.
- Collaborated with API teams to optimize performance, delivering seamless and robust integrations.

Software Engineer
MagikMinds, Hyderabad

APR 2015 – APR 2017

- Developed and maintained hybrid and native Android applications using Ionic and Angular frameworks.
- Engineered applications like Book a Service for real-time appointment tracking and COPSZ, a task management app for police departments.
- Created safety-focused applications such as In Case of Emergency and Touch Red, providing panic buttons and emergency contact notifications.
- Designed navigation tools like GPS Navigator and GIS-based solutions like the Marblesz Platform.

Co-Founder
Heartynote, Hyderabad

APR 2014 – APR 2015

- Led the end-to-end development of a secured personal social networking platform, delivering innovative features to enhance user engagement.
- Designed a comprehensive dashboard with features like infinite scroll, hearty diary, profile management, and personalized content.
- Engineered the ROOM feature for private group sharing, along with modules like HeartyStatus, HeartyTV, and Hearty Chat.
- Implemented core functionalities like calendar notes, notifications, and a robust search engine, ensuring a seamless user experience.
